

## **Commissioning Engineer (FIFO, Cape Lambert)**

*Delivering the Electrical Package for one of the largest Brownfields Projects in the Pilbara*

---

### **Role Purpose**

We are seeking a Commissioning Engineer, to join awarded Conveyor & Electrical Infrastructure Upgrades Package on the Cape Lambert A High Density Ore (CLAHDO) Project on the Pilbara coast in Western Australia. This project involves significant electrical, instrumentation and control system upgrades, conveyor drive station upgrades and other infrastructure upgrades. This presents an opportunity to be based on this milestone project for its duration, and scheduled for completion in August 2026, with the potential for further opportunities thereafter on alternate projects.

### **About our Client**

Working for Intensify Professional Services, you will be embedded into the Linkforce project team. Linkforce is a leading integrated project delivery, maintenance, engineering, and services business. Founded in 2007, Linkforce began with a small crew of shutdown specialists and a single utility operating in the Pilbara. Today, Linkforce has grown into an organisation of more than 3,000 personnel supported by a modern fleet of vehicles and equipment operating nationwide.

The company's Projects business unit has a proven capability in multidisciplinary project delivery, executing both Brownfields and Greenfield work packages. Linkforce has consistently delivered high-quality outcomes for its blue-chip mining clients, from design through to completion and handover. Its teams manage and maintain all aspects of project works including remedial and expansion projects.

### **Values**

The role embodies the shared values of Linkforce and Intensify, ensuring business growth is delivered ethically, collaboratively and with lasting community benefit.

#### *Intensify Values*

Lead with Integrity and Empathy – Act with honesty, professionalism, and transparent communication.

Deliver Practical, Lasting Solutions – Combine technical expertise with hands-on experience to achieve measurable, sustainable outcomes.

Empower People, Respectfully – Connect, mentor, and build capability through shared knowledge.

#### *Linkforce Values*

People – Our people are our greatest asset.

Unity – Working together to achieve shared success.

Agility – Adapting quickly to challenges and opportunities.

Determination – Driven to deliver outstanding outcomes.

Delivery – Committed to quality and excellence in every project.

Excellence – Pursuing best practice in everything we do.

Make a Difference – Ensuring our work delivers lasting benefit to our people, clients, and communities.

### **Key Responsibilities**

As a Commissioning Engineer you will be working on a FIFO roster and responsible for:

- Developing and revising the commissioning program in consultation with the Project Manager
- Developing and approving Commissioning ITPs & ITRs, testing procedures, and documentation
- Ensuring all site acceptance testings have been performed and ITPs & ITRs have been completed
- Testing and Commissioning of SMPEIC package of works
- Fault finding and subsequent rectification of newly installed systems
- Endorsement and assignment of Commissioning supervision and technicians
- Completion and integrity of the punch-list and protection register
- Overseeing teams of commissioning personnel, including oversight of vendor commissioning representatives
- Ensuring a review is conducted prior to each major phase of commissioning to avoid safety or environmental incidents
- Meeting with clients and subcontractors and being involved in technical discussions

### **About You**

- Minimum 2 years' experience in pre-commissioning and commissioning activities for HV substations, switchgear and drive motors
- Engineering Degree
- Experience in testing and fault resolution in HV/LV power systems
- Ability to manage risk throughout the project lifecycle through development and implementation
- Ability to engage effectively with stakeholders both externally and internally
- Ability to adapt to changing priorities
- Excellent problem solving skills and time management

### **Employment Structure**

- ▲ Engaged by Intensify Professional Services, seconded to Linkforce under a Services Agreement.
- ▲ Receives ongoing mentoring and support through Intensify's Director.
- ▲ Operates within Linkforce's organisational framework, under the direction of the Project Manager.
